Group of companies ZERS («Finishing, operation and repair of wells»)

develops, produces and delivers the full range of equipment for finishing, repair and operation of oil and gas wells for 15 years. Also it provides services for its products in field conditions operation.

From its establishing in 1998 **ZERS** developed and introduced into production more than 300 of different technical products used in cementing, finishing and repair of wells, ran in more than 60000 ZERS devices.

GC "ZERS" performs packaged supply of equipment for branch holes fixing including all necessary accessories (shoes, non-return valves, welded bow-spring centralizers, strainers, casing packers, staged colalar cementing and hydraulic fracturing collars, liner hangers, swellable packers and etc.) to various oil companies of the Russian Federation, such as Rosneft, Gazpromneft, TNK-BP, Tatneft, Bashneft, etc.

GC "ZERS" includes two factories of its own and also the experimental base of its own.

"ZERS" has four service and storage representation offices where highly skilled professionals work. They provide services for its products (since its establishment till present more than 4000 wells were serviced).

Our representation offices:

- **Noyabr'sk**
- **Nijnevartovsk**
- **Ryazan**
- **Buzuluk**

Since 2013 we are members of the Contract Drilling Companies Association.

We'll be glad to send our catalogues to you and provide you with more detailed descriptions of our technical devices for finishing, operation and repair of wells, conclude an R&D agreement, contracts for technical devices of national production supply and for petrotechnical support of their operation in different geological and technical conditions.

Please forward your responses by tel/ fax: +7-495-632-21-94, 632-21-95, 632-21-96, 632-21-97 or e-mail: info@zers.ru Our website: www.zers.ru
